Project Name	BookEase – Multi-Role Online Bookstore Platform
Maximum Marks	4 Marks

Persona: Ananya Rao — 27, working professional and avid reader

Ananya represents the primary customer segment for BookEase: busy urban readers who want a wide selection of books, fair prices, and a hassle-free buying experience without visiting multiple stores.

Quadrant	What we observed
SAYS	"I never have time to visit a bookstore." / "I want genuine reviews before I buy." / "Delivery charges put me off small orders."
THINKS	"Is this book actually worth the price?" / "Will my order reach me on time?" / "I hope my cart isn't lost if I get logged out."
DOES	Compares prices across sites, checks ratings/reviews before purchase, saves books to a wishlist before buying, checks return/cancellation policy.
FEELS	Frustrated when a cart disappears or checkout is confusing; delighted by a good discount or new arrival; anxious about payment security and delivery delays.
PAIN POINTS	Limited genre variety at nearby stores, slow/unclear delivery tracking, hidden costs revealed only at checkout, cluttered or confusing UI, no easy way to cancel an order.
GAINS	Personalized recommendations, transparent pricing with GST/discount breakdown, persistent cart across sessions, simple order cancellation with reason tracking, wishlist for later purchases.
