

Ideation Phase

Brainstorm & Idea Prioritization

Date	19 July 2026
Team ID	[Enter Your Team ID]
Project Name	BookEase – Multi-Role Online Bookstore Platform
Maximum Marks	4 Marks

Step 1: Team Gathering & Problem Statement Selection

The team reviewed all three problem statements (PS-1 Customer, PS-2 Seller, PS-3 Admin) and selected them together as one connected problem: "Readers, independent sellers, and platform operators all lack a single trustworthy, easy-to-use online bookstore that serves each of their needs." This became the shared focus for BookEase.

Step 2: Brainstorm, Idea Listing & Grouping

Ideas generated by the team were grouped into six themes:

- Catalog & Discovery: genre browsing, search by title/author, filters (price, rating, language), best-seller & new-arrival tags
- Cart & Checkout: persistent cart, coupon codes, GST/delivery breakdown, multiple payment methods
- User Accounts: registration/login, profile management, wishlist, order history
- Seller Tools: seller registration, book listing (add/edit/delete own books), order fulfillment view
- Admin Controls: seller approval, user management & ratings, book/category management, order oversight, dashboard analytics
- Trust & Communication: ratings & reviews, order status tracking, cancellation with reason, confirmation notifications

Step 3: Idea Prioritization

Each idea was scored on customer/business impact versus implementation effort, then prioritized for the roadmap.

Idea	Impact	Effort	Priority
Book search & genre/category filters	High	Low	High
Wishlist	Medium	Low	High
Persistent cart across login sessions	High	Medium	High
Multi-seller catalog support	High	High	Medium
Seller registration & admin approval workflow	High	Medium	High
Order cancellation with mandatory reason	Medium	Low	High
Coupon / discount codes	Medium	Low	Medium

Idea	Impact	Effort	Priority
Ratings & reviews for books and sellers	High	Medium	High
Admin dashboard with sales analytics	Medium	Medium	Medium
Order status tracking (Pending → Delivered)	High	Low	High
Online payment gateway integration	High	High	Low (future)
AI-based book recommendations	Medium	High	Low (future)
