Project Name	BookEase – Multi-Role Online Bookstore Platform
Maximum Marks	4 Marks

Project Overview

Project Name: BookEase – Multi-Role Online Bookstore Platform

Project Description: A MERN-stack e-commerce application where customers browse and buy books, independent sellers list and fulfil their own inventory after admin approval, and admins manage users, sellers, books and orders.

Project Version: 1.0

Testing Period: [Start Date] to [End Date]

Testing Scope

Registration & login for Customer, Seller and Admin roles

Profile management (update details, upload picture, password reset)

Book browsing, search, filtering and sorting

Wishlist add/remove

Cart add/update/remove, coupon application, and cart persistence across logout/login

Checkout, order placement, order tracking and order cancellation with reason

Seller book listing (add/edit/delete) restricted to own books, gated by admin approval

Seller order fulfillment view and status update

Admin: seller approval, user management & ratings, book/category management, order management, dashboard analytics

Testing Environment

URL / Location: [Staging or Production URL] (e.g., <https://your-project.vercel.app>)

Credentials (if required): Test customer / seller / admin accounts to be shared separately.

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Customer registration	1) Go to Register 2) Fill valid details 3) Submit	Account created and user is auto-logged in	As expected	Pass
TC-002	Login with valid credentials	1) Go to Login 2) Enter valid email/password 3) Submit	JWT issued, redirected to home or role dashboard	As expected	Pass
TC-003	Profile address update persists	1) Login 2) Edit profile address fields 3) Save	Address fields save correctly on reload (JSON-parsed on backend, not spread as a string)	As expected after fix	Pass
TC-004	Cart persists after logout/login	1) Add item to cart 2) Logout 3) Login again	Cart shows the same items immediately (auto-fetch + localStorage cache)	As expected after fix	Pass
TC-005	Order cancellation requires a reason	1) Go to Orders 2) Click Cancel Order 3) Try submitting with no reason	Submission is blocked until a reason is entered; reason is saved with the order	As expected	Pass
TC-006	Seller cannot list before approval	1) Register as seller 2) Attempt to add a book while status is "pending"	Book creation is blocked until an admin approves the seller account	[Record actual outcome]	[Pass/Fail]
TC-007	Admin approves seller	1) Login as admin 2) Open Seller Management 3) Approve pending seller	Seller status changes to "approved" and they can now list books	[Record actual outcome]	[Pass/Fail]
TC-008	Insufficient stock at checkout	1) Add more quantity than available stock 2) Proceed to checkout	Checkout is blocked with an "insufficient stock" message	[Record actual outcome]	[Pass/Fail]

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Profile address not saving — backend spread a JSON string instead of the parsed address object	1) Update profile address via multipart form 2) Reload profile	High	Closed	Fixed by JSON.parse-ing the address field before merging in updateProfile
BG-002	Cart appears empty right after logging back in, even though items were saved	1) Add to cart 2) Logout 3) Login again 4) Check Navbar/Cart badge before visiting Cart page	Medium	Closed	Fixed by auto-fetching the cart on login and caching it in localStorage per

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
					user
BG-003	[Describe the issue or bug encountered]	1) [Step 1] 2) [Step 2]	[Low/Medium/High]	[Open/In Progress/Closed]	[Any additional comments or feedback]

Notes

- Test cases cover both positive and negative scenarios.
- Testers should provide detailed feedback, including suggestions for improvement.
- Bug tracking includes severity, status, and steps to reproduce for every defect.
- Sign-off is obtained from both the project mentor and product owner before deployment.
